

# Effluent Treatment Plants Product Information

## Industrial Effluent Plants

Over the past several years KCS have installed, commissioned and maintained numerous industrial effluent treatment control systems across a variety of industries from plating lines through to food processing plants. The control systems include waste transfer, pre-treatment and consent monitoring.

## Chemical Treatment

As the sole UK distributor for the Epofloc and Cleanfloc series of products we are able to treat heavy metals, sulfates and others from your waste water as well as providing defoamers and aluminium based precipitants.

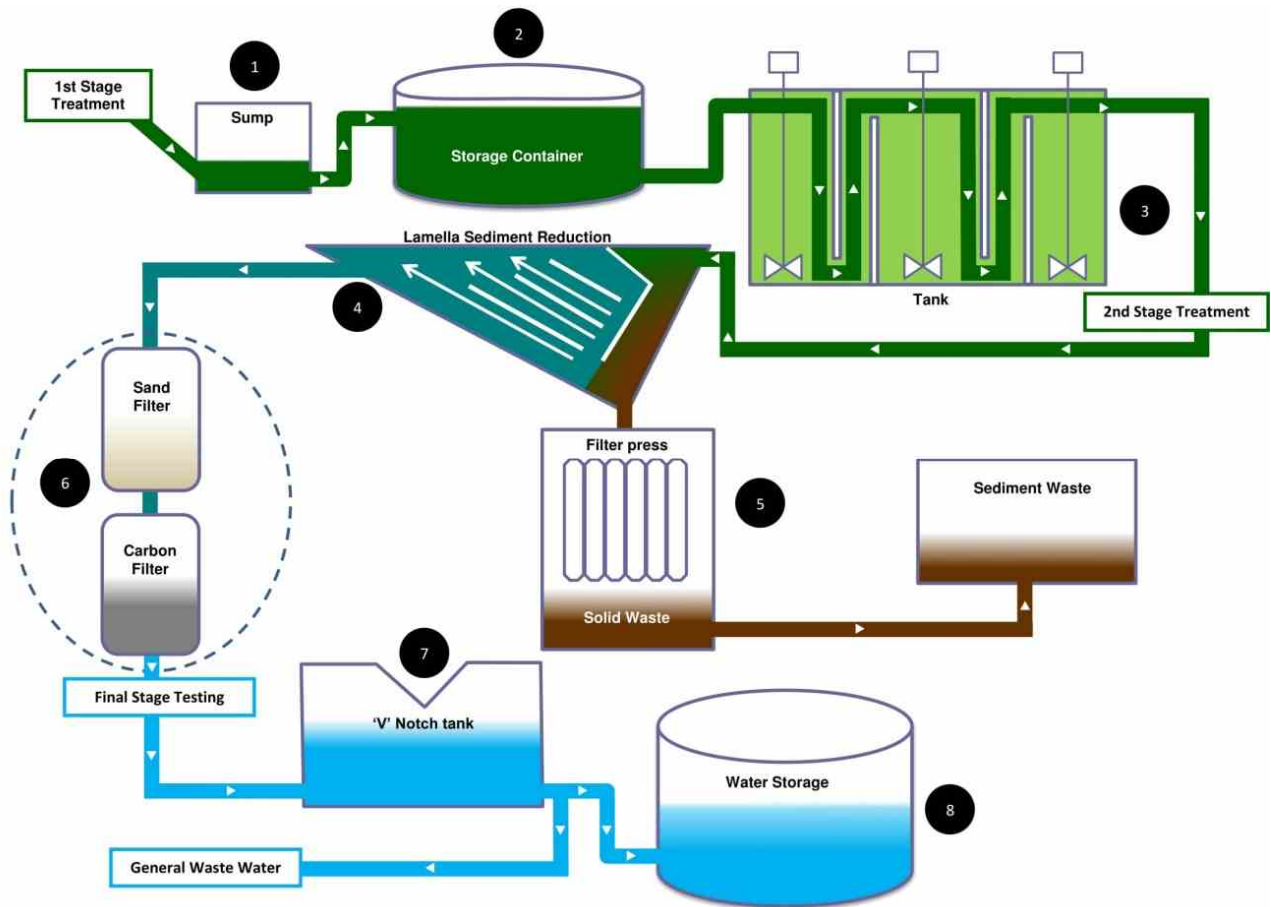

Furthermore we can supply you with all the products necessary for advanced wastewater treatment.

We offer a free analysis service which will provide suitable products and dosing levels

## EFFLUENT TREATMENT PLANTS

## One solution

Waste water treatment is a technique composed of many tasks and requires perfectly coordinated processes.

KCS offer a reliable solution by providing

- Condition assessment
- Planning and realisation of treatment plants
- Onsite technical support
- Analysis and monitoring
- Supply all chemicals for the treatment process
- Control system design and implementation

## Industries covered

- Incineration plants
- Cast iron and steel producers
- Battery manufacturers
- Metal working industries
- Printers
- Galvanising and plating plants
- Coal Power plants
- Biomass Power Plants
- Dairies
- Glass and ceramic producers
